First strand CDNA synthesis was primed with an oligo-dT primer containing a Not I site. Double stranded cDNA was ligated to an ECR I adaptor, digested with Not I, and cloned directionally into pT7T3-Pac vector. The oligonucleotide used to prime the synthesis of first-strand cDNA contains a library as sequence that is located between the Not I site and the (dT)la tail. The sequence tag for this

//oote="Organ: kidney; Vector: pExpress-1; Site_1: EcoRV; Site_2: Nor!; RNA obtained from pooled kidney tissue from a mix of male and female animals at 8 wk old. Tissues were snap-frozen before RNA extraction and purification (Tri-reagent method). CDNA was primed using oligo-dT primer: 5-pGACTAGTTCTAGATCGCGAGCGCCCC(7)25-3' and cloned into the EcoRV/NotI sites of pExpress-1. Size-selection >1.4kb fesulted in an average insert size of 2.2 kb. This primary library is non-normalized constructed by Express Genomics (Frederick, MD). Note:

Sequence 7, Application US/09671050

Patent No. 6716616

GENERAL INFORMATION:
APPLICANT: Donoho, Gregory
APPLICANT: Nehls, Michael
APPLICANT: Priedrich, Glenn
APPLICANT: Zambrowicz, Brian
APPLICANT: Sands, Arthur T.
ITLE OF INVENTION: No. 67166161 Human Kinase Proteins and
ITLE OF INVENTION: Polynucleotides Encoding the Same
FILE REFERENCE: LEX-0046-USA
CURRENT FILING DATE: 2001-06-11
PRIOR APPLICATION NUMBER: US/09/671,050

CURRENT FILING DATE: 1999-09-28
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Query Match 48.1%; Score 454.4; DB 4; Length 594; Best Local Similarity 99.8%; Pred.
